- Name: Halite
- Subject area: agent strategy game
- Type: web site where you can upload agents to compete against other players
- Grades: high school and undergraduate
- URL: halite.io
- Creator: Two Sigma Recruiting

Description: Halite is an artificial intelligence programming challenge, created by Two Sigma, where players build bots using the coding language of their choice to battle on a two-dimensional virtual board. A wide variety of languages are supported. The Halite competition is a fun way to learn and apply AI, machine learning, and other advanced algorithms by writing smart bots in a collaborative, challenging game setting.
