- Name: Machine Learning for Kids
- Subject area: Machine Learning
- Type: Web site with a variety of AI demo projects/activities powered by Scratch extensions
- Grades: elementary and up
- URL: machinelearningforkids.co.uk
- Creator: Dale Lane, IBM

Description: introduces kids to machine learning by providing hands-on experiences for training machine learning systems and building things with them in Scratch. Includes roughly two dozen projects students can build. Each project includes written guidance for teachers and a project worksheet for students.
