Calypso for Cozmo

- Name: Calypso for Cozmo
- Subject Area: Robotics; General AI
- Type: software package
- Requirements to run: Cozmo robot; laptop running Windows, MacOS, or Linux
- Grade(s): 3-12
- URL: calypso.software
- Author: David Touretzky, Visionary Machines LLC and Carnegie Mellon University
- License: commercial software

Description: Calypso for Cozmo is a rule-based robot programming framework for the Cozmo robot by Anki. It can be used to demonstrate a variety of artificial intelligence concepts, including computer vision, face recognition, speech recognition, landmark-based navigation, path planning, and object manipulation. Free curriculum materials are available at the Calypso.software web site.
