eCraft2Learn

- Name: eCraft2Learn
- Subject Area: General AI
- Type: Web site with a variety of AI demo projects/activities powered by custom created Snap! extensions
- Grade(s): 3 and up
- URL: ecraft2learn.github.io/ai
- Creators: Ken Kahn and Niall Winters, University of Oxford
- License: New BSD

Description: The eCraft2Learn project is developing a set of extensions to the Snap! programming language to enable children (and non-expert programmers) to build AI programs. Activities include speech recognition and generation, image recognition, machine learning, and language processing.
